ThinkEdge SE30

Tackling demanding tasks in demanding environments is what the SE30 was designed for. Powered by the latest 11th Generation Intel® Core™ i5 vPro® processors for industrial computing and high-speed DDR4 memory, the SE30 is ready-built for challenging edge applications.

When it comes to an IoT-ready platform, the SE30 is a game-changer. It supports Wi-Fi, Bluetooth®, and 4G LTE or 5G WWAN wireless connections to efficiently transport your IoT data to the cloud or your data center. With a scalable IOBOX for additional connectivity, the SE30 delivers expandability features optimized for industrial environments that operate a wide variety of devices.

With an innovative fanless design that guarantees efficient heat dissipation (thermal range of -20°C to 60°C) and with MIL-STD-tested device reliability, the SE30 offers durable performance for uninterrupted productivity, even in harsh environments.

CORe

ThinkEdge SE30

BOOSTS PRODUCTIVITY
Powerful Intel® Core™ processors, superfast up to 16GB of DDR4 and up to 1TB of storage, make everyday tasks faster and smoother now while also futureproofing against your edge computing needs.

UNMATCHED RELIABILITY
The SE30 is MIL-SPEC tested for its 24x365 ability to withstand extreme temperatures and harsh conditions. That means it stays reliable and keeps you productive over the long haul.

COMPACT DESIGN
With an ultra-small form factor (0.81L), the SE30 packs more computing power into a smaller footprint. Easy to mount, it can be tucked behind a monitor, placed under the desk, or mounted on the wall—wherever you like it.

CONVENIENT CONNECTIVITY
The SE30 features standard dual ethernet ports and can be equipped with 4G LTE or 5G WWAN for wired and wireless connectivity. An optional IOBOX with configurable serial interfaces, two POE ports, and DI/DO connectors provides even greater connectivity for manufacturing scenarios. The SE30 also serves as a bridge, communicating with both WWAN and dual LAN devices.

IT benefits

RELIABILITY AND STABILITY
The SE30 is MIL-SPEC tested for durability, including unanticipated temperature shocks. Fanless design ensures efficient heat dissipation for improved performance.

SECURITY
The TPM 2.0 hardware cryptoprocessor chip uses RSA encryption to protect user information, while the Kensington™ lock slot offers physical security against device theft. The available Hardware Watchdog Timer can prevent disruptions to your system's operation and a self-healing BIOS will ensure maximum uptime for consistent productivity.

FLEXIBILITY
An array of accessories allows the SE30 to be securely mounted on a wall, under a desk, or behind a monitor using VESA mounts, power cage, or DIN rails.

MANAGEABILITY
Built for evolving IoT environments, the SE30 with 11th Gen Intel® Core™ i5 vPro® processors for industrial computing has been certified for Windows 10 IoT Enterprise, Microsoft® Azure IoT Edge, RedHat®, Amazon Green Grass, and Ubuntu®, making analyzing and reporting of devices in the network effortless.

USE CASES FOR SE30

smart retail/hospitality
Retailers can rely on the SE30 to power signage and capture data from multiple sources simultaneously, including sensors, traffic counters, and thermostats.

smart manufacturing
The SE30 helps drive manufacturing and production automation, with faster data processing from operations to IT.

smart healthcare
The SE30 can replace thin client devices in healthcare settings, taking up even less space while offering full connectivity and computing capabilities.

recommended services

PREMIER SUPPORT
Bypass phone menus and scripted
troubleshooting to access advanced-level
technicians with the expertise needed
to quickly diagnose and solve problems.
Get a consistent point of contact within
Lenovo to ensure that your case resolution
is professionally managed from start to
finish. [1,2]

ACCIDENTAL DAMAGE PROTECTION (ADP)
Protect your investment from operational
or structural damage caused by common
accidents like drops, spills, or electrical
surges. This protection plan helps
with predictable budgeting, minimizes
unexpected repair costs and provides
significant savings relative to the cost of
non-covered repairs.[1, 2]

WARRANTY EXTENSION
This fixed-term, fixed-cost service helps you
accurately budget for PC expenses, protect
your investment, and lower the cost of
ownership over time.[1]

WARRANTY UPGRADES
Onsite Service maximizes PC uptime and
productivity by providing convenient, fast
repair service at your place. In addition,
with Tech Install CRU service the installation
of all internal Customer Replaceable Unit
(CRU) parts will be done on your behalf by a
trained technician.[1]

[1] Up to 5 years total duration

optional accessories

SE30 MONITOR CLAMP (PN:4XF0V81633)
Use this clamp to install your SE30 unit to a monitor to further
save space.

SE30 POWER CAGE (PN:4XF0V81631)
The power cage BKT works with VESA-compatible equipment
and also with allocation of AC adapter.
